

INSTALLATION INSTRUCTIONS

LMS600 Series (BACKBOX SHIPPED AHEAD)

- Power **must** be off during installation and maintenance!!
- Fixtures **must** be installed by a licensed electrician and in accordance with the National Electrical Code and any local codes that may apply!!

1. Note the two threaded holes (1) - diagonal from one another - one in each corner of the bottom of the interior of the backbox. Position the backplate assembly (2) over the two holes (1) of the backbox and tighten down firmly with the supplied hardware.
2. Orient the supply wires (3) into the junction box on the fixture housing.
3. Position the reflector down onto the center casting boss (4), being sure to align the sockets through the reflector socket holes. Secure the reflector down with the supplied hardware.
4. Connect incoming power wires to the fixture's supply wires in accordance with the National Electrical Code and any applicable local codes. ~~Be sure that the voltage is correct!!~~ ..
